

## MEASURE NITRATE LEVELS TO MAXIMIZE NITROGEN EFFICIENCY

Without measurement, knowing how much nitrates are available in the soil is a mystery. Eliminate the guesswork from your application with 360 SOILSCAN – a portable soil test system that gives you the ability to test N availability and soil pH with the accuracy of a traditional soil lab. Testing only takes about five minutes, and you can do it right in the field. After measurement is complete, 360 SOILSCAN combines your yield goal, crop growth stage and soil organic matter levels to build a customized nitrogen application that fits your crop's N needs.

## + BUILT FOR THE FIELD

Understanding nitrogen availability in real time takes a system designed for the challenges of the field. With 360 SOILSCAN, you get a soil testing system that's durable, portable and just as accurate as a commercial soil lab.

- + Durable: Rugged case protects it from the elements
- + Expandable: Four sensor slots to allow for future innovations
- + Portable: Easily transported and operated from the back of your truck or ATV
- + Functional: Uses your iPad® as the operating platform and upgrades without new hardware

## + TIMELY AND ACCURATE RESULTS

Real-time measurements mean nothing without accuracy. That's why 360 Yield Center participates in the Agricultural Laboratory Proficiency (ALP) Program – a national proficiency testing program that monitors soil analysis for consistency, accuracy and reliability. So far, 98% of 360 SOILSCAN machines have passed the certification, giving them the same accuracy as traditional labs.

**The combination of 360 SOILSCAN and 4R practice has led us to be more responsible stewards of our farm, creating environmental benefits for our community and economic benefits for ourselves.**

## KEY FEATURES

Easy to transport and operate from the back of your truck or ATV.

Rugged carrying case holds all components and protects it from the elements.

Consistent and repeatable results verified by the Agricultural Lab Proficiency Program.
